

Impact Value Summary™ Benefit-Cost Analysis

This prospectus outlines the social value created by Tech Dump. The goal of this document is to communicate the cost-benefit ratio of this organization's programming that goes above and beyond traditional financial returns.

THE SOCIAL PROBLEM

For people who have spent time in corrections, post-release opportunities for employment are commonly blocked by employer restrictions, lack of meaningful work history, lower rates of previous education attainment, and attitudes towards ex-offenders. Many government and non-profit programs assist with other stabilizing necessities such as housing, counseling, soft-skills training, and job searching, but do not offer on-the-job-training & paid employment right away.

THE IMPACT OF THIS ORGANIZATION

Tech Dump

Tech Dump's electronics recycling and refurbishing social enterprise reduces electronic waste in the Twin Cities and transforms lives through a long-term job skills program. The paid, 18-month, on-the-job training program focuses on supporting adults facing barriers to employment & preparing them to be valuable employees with an expanding future.

Tech Dump's impact includes extensive job training that leads to living wage employment; responsible electronics recycling and refurbishing that lessens the harmful effects of pollution in our environment; and refurbished electronics that make technology affordable, with prices 75% lower than traditional retail.

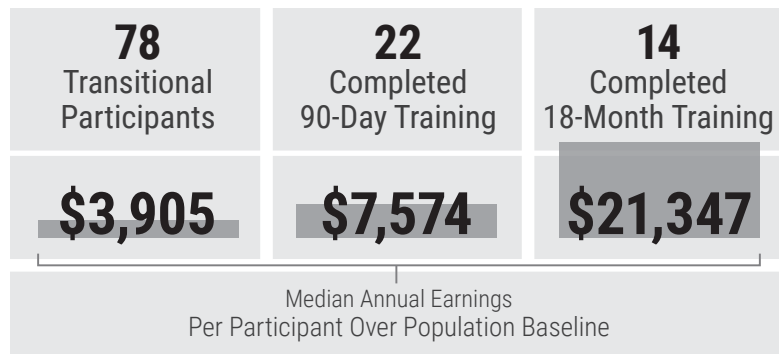

The Focus of This Organization's Social Impact

Job Training – Tech Dump's job training program provides skills training, customized development plans based on career goals, and ongoing coaching and support. Graduates go on to secure full-time positions at Tech Dump or other recycling organizations, leading to self-sufficiency and career growth. Investing in individuals with barriers to employment helps build the human and social capital needed to overcome the myriad challenges of re-entry, and help build stable lives and safer communities.

Electronics Refurbishing & Recycling – Tech Dump provides environmentally and socially responsible solutions to getting rid of unused and broken computers, cell phones, and other electronics. Third-party auditing ensures safe processing and secure data destruction, and Tech Dump prioritizes reuse and recovery over disposal of materials.

UN Sustainable Development Goals (SDGs)

This organization addresses the following UN SDGs.
